

Future Design Possibilities

Immerse yourself into your future, where exponential technologies impact our way work and being in the world. Explore powerful tools from Singularity University customised for your unique context.

OVERVIEW

Why you need this

- We live in the most extraordinary times
- Emerging exponential technologies and business models are already shifting how we:
 - work with each other
 - interact and engage with each other
 - the mindsets, beliefs and skills that we need
- Can you imagine a world:
 - in which you are working in an integrated way with AI, robots, Virtual and Augmented Reality every day
 - where the internet is ubiquitous and information is continuously on tap
 - where you are bio-enhanced through embedded tech, wearable devices and live in a smart city
 - where jobs and roles have changed so significantly that we need a whole new set of skills
- Can you also imagine a world that has some real global challenges i.e. resource shortages, refugee crises, health risks, leadership and education crises, youth unemployment, terrorism and conflict, urban decay, poverty, privacy/ethical dilemmas, financial instability etc
- Now can you imagine YOU in this world?
- Come and join us for a journey of discovery into the future of Singularity, where you can explore all of these questions and get a glimpse of who you could become and what it would take to get there

TARGET AUDIENCE

Who needs to attend

Leaders, influencers and innovators who wish to be courageous co-creators, contributors and custodians of our future world. Also for those in need of a re-invention and a renewed sense of purpose and impact. This workshop can be customised for teams at various levels of functions

*As owners of our business, we live our culture .. as collaborative, courageous creative
Catalysts ... connecting people with purpose
As Catalysts: we accelerate learning and change.
We are agile and execute at pace with quality.
We are fast, flexible, focused and fun.*

OUTCOMES

What you will get

- Gain exposure to emerging exponential technologies and innovations
- Experience **The Mars 1** project in action
- Imagine possible scenarios for the future world of life and work
- Explore **jobs and skills** of the future
- Challenge assumptions to identify future **personas** for yourself and others
- Courageously step into your future persona and build **your character** and who you could become
- Create your **future imagined world** and your role in it – what would that take?
- Dream about your **vision quest and key concept** for your own unique impact
- **Expand your mind** and ability to innovate through **Bad ideas, abundance consciousness and Exponential Moon shot thinking**
- **Time-line** and future pace your best vision of yourself through a **Retrocast** process
- Learn **powerful tools and techniques** including visualisation, mindfulness, NLP timeline anchoring, immersion, play, story-boarding, graphic capturing, collaborative learning, etc
- You will leave with a process, tool and activities that you can use immediately for transforming your own impact AND those that you work with
- **EXPLORE, EXPERIMENT, IMAGINE, LEARN A NEW TOOL, DISCOVER A NEW VISION, COLLABORATE AND HAVE FUN**

OUTLINE

What you will learn

Module 1: Future world building	Module 2: Future character building	Module 3: Retrocast – back to the future
<ul style="list-style-type: none"> Emerging exponential technologies and innovations The Mars 1 project in action Future scenarios Jobs and skills of the future 	<ul style="list-style-type: none"> Future personas imagining Character building – who you could become Future world building assumptions Vision quest and key concept 	<ul style="list-style-type: none"> Innovation through Bad ideas Mindset challenge on abundance consciousness Exponential Moon shot thinking Time-line and future pace - Retrocast process

APPROACH

How you will learn

Engage everyone fully throughout the day to create a fun, stimulating, interesting, creative “vibe” with multi-modal activities including: visuals, music, activities, reflection, mindfulness, discussion, movement, handouts, charts, videos. Highly trained and internationally experienced facilitators, who understand neuroscience, accelerated learning, behavioral shift, gamification and engagement. Experience with integrating with digital learning platforms. Ensure unique context and audience is understood and aligned.
